

Productivity & Habits

Design systems that scale with your brand and your team

A practical deep-dive into the architecture, principles, and workflows behind high-performing design systems. Learn to create living ecosystems that keep your product consistent, your team aligned, and your codebase clean — from foundation to scale.

6 modules

What you'll learn

- ✓ Define a scalable design system architecture
- ✓ Bridge the gap between design and development handoff
- ✓ Establish consistent, reusable component patterns
- ✓ Implement governance and versioning for long-term growth

Syllabus

1 Make it count

Prioritize One thing

2 Build habits

Habits that stick Beat procrastination

3 Organize your life

Your system Rest well

Who is it for?

Product designers, UX/UI professionals, and frontend engineers who need to build and maintain scalable design systems.
